Are You Ready to Take Your Workwear
to New Heights? 11

About Viking Rubber Co. 12

Are you ready to set sail for your next
workwear adventure? 12

If you work in rope access, you work under an extraordinary set of circumstances. You are exposed to the elements without shelter. You must carry your equipment on your person. And you need to do this while hanging on a rope.

This is something regular workwear does not support.

Therefore, we have developed a workwear collection tailor-made for industrial rope access. A collection of optimised workwear that supports the working conditions and meets the needs and requirements specific to rope access.

The Extreme Access collection consists of 3 different product series created with working rope technicians.

This collaboration has given deep insights into the daily challenges in rope access. To ensure that any rope technician feels safe and comfortable – no matter how high they climb.

Discover the result in this product catalogue.

Enjoy!

WORKWEAR TAILORED FOR WORKING IN THE HEIGHTS

Extreme Access is designed with challenging work conditions in mind. Because when you work in industrial rope access, you work under extreme circumstances – and here, ordinary workwear just does not cut it.

We have modified our Extreme Access collection to accommodate the particular working conditions in rope access to create reliable workwear.

- First and foremost, we have added extra length to the sleeves and trousers. Since a rope technician primarily works seated in a harness, the jacket and trousers will ride up, leaving a patch of exposed skin. To alleviate this problem, we have added additional length to all products in the Extreme Access collection to keep the rope technicians warm, dry, and comfortable under any weather condition.
- When you work in rope access, you spend most of your workday wearing a harness and rope - something that is rough on ordinary workwear. To fix this and provide more long-lasting workwear, we have added extra-durable reinforcement to the shoulders and arms on the jacket and the knees, seat, and lower part of the trouser to ensure long-lasting workwear.
- A challenge in rope access is that you need to carry everything yourself. A rope technician does not have additional storage nearby and must climb up and down to gather supplies – so more space equals less unnecessary climbing. Another challenge is the placement of the rope and harness that blocks access to the pockets in regular workwear. For this reason, we have rethought the pocket placement in the Extreme Access collection to ensure optimal pocket space with easy access.

ULTIMATE – FOR THE MOST DEMANDING CUSTOMER

Our Ultimate series is developed to handle even the most extreme circumstances. The series consists of a wind- and waterproof jacket and trousers, detachable braces, ID pocket and walkie pockets.

Ultimate workwear is characterised by ultrahigh breathability and water resistance to ensure the user is comfortable no matter the weather condition. It is possible to attach the jacket to the trousers with a zipper to avoid cold drafts to the torso.

The big front pocket has been adjusted with 2 openings to allow the rope technician easy access when wearing the harness.

ULTIMATE JACKET SPECIFICATIONS

- Style: 111143-181-H2Z9
- Layers: 2-layer
- Stretch: 4-way
- Size: S – 3 XL
- EN Standard: EN20471 class 2 + EN343 class 4
- Waterproofness: 20,000 mm
- Breathability: 15,000 g/m²/24hr.

ULTIMATE TROUSERS SPECIFICATIONS

- Style: 122086-181-H2Z9
- Layers: 2-layer
- Stretch: 4-way
- Size: S – 3 XL
- EN Standard: EN20471 class 1 + EN343 class 4
- Waterproofness: 20,000 mm
- Breathability: 15,000 g/m²/24hr.

DESIGNED WITH THE END-USER

Who knows the challenges of working at a high altitude better than the rope technicians themselves?

No one.

Therefore, we conducted 20 in-depth interviews with working rope technicians before designing Extreme Access. To ensure that our collection met the actual challenges of working in rope access, we also carried out a quantitative test with approximately 80 rope technicians.

We used the gathered insights, feedback, and wishes from rope technicians to develop a collection of workwear that solves real challenges and makes a noticeable difference for the end-users.

TRY IT OUT YOURSELF

Extreme Access is workwear you can rely on no matter how high you climb. But of course, that is easy enough to say...

We offer a 60-day trial period – money-back guarantee so you can see for yourself what a difference customised workwear makes when you climb high.

Click the button below and fill out the form, and we will get in contact with you.

TRY IT OUT

PERFORMANCE – FOR USE ALL YEAR ROUND

Performance
workwear is usable
all year long

The series consists of a jacket and trousers. It has a detachable ID pocket and walkie pocket, and detachable hanging pockets.

Hanging pockets are usually not permitted in rope access due to safety concerns. However, the Performance hanging pockets can be closed off, making them safe to use – even in high altitudes. You can attach the jacket to the trousers with a zipper to avoid cold drafts to the torso.

The softshell jacket ensures exceptional breathability. This makes Performance a great option for even the warmest of days and secures that the user is comfortable. The wind and water repellent jacket makes Performance functional all year round. However, on days with extreme weather Ultimate will provide better support.

PERFORMANCE JACKET SPECIFICATIONS

- Style: 111142-180-H2Z9
- Layers: 3-layer
- Stretch: 4-way
- Size: S – 3 XL
- EN Standard: EN20471 class 2
- Waterrepellant
- Breathability: 20.000 g/m2/24hr

PERFORMANCE TROUSERS SPECIFICATIONS

- Style: 422085-413-H2Z9
- Stretch: 4-way
- Size: 44 - 64
- EN Standard: EN 20471 class 1

DESIGNED WITH SAFETY IN MIND

The most important concern in rope access is safety.

And Extreme Access is designed especially for users who need to wear all kinds of protective gear.

We have added Velcro-secured pockets with internal D-rings. This allows the user to carry tools and equipment safely. To ensure no harm will come to the rope technicians, all D-rings are designed to break away at 5 kg to avoid accidents.

All Extreme Access workwear is made in HiVis fabric. This is done to ensure that the user will be visible under all circumstances.

EXPERIENCE – STRONG AND COST-EFFECTIVE

Experience was the first product series developed in the Extreme Access collection. It was designed to help people who climb in all kinds of weather to support – not hinder – them to reach new heights.

It consists of a jacket and pants. And just like the Ultimate products, you can zip the pants and jacket together to avoid cold running up your back.

It is a solid set of workwear that will support you no matter how high you climb. Big front pockets with zipper and velcro.

EXPERIENCE JACKET SPECIFICATIONS

- Style: 111084-120-H3Z9
- Size: S-3XL
- EN Standard: EN20471 class 3 + EN343 class 3
- Waterproofness: 8000mm
- Breathability: 4000g/m2

EXPERIENCE TROUSERS SPECIFICATIONS

- Style: 122025-120-H3Z9
