

AIRPORT COLLECTION

HIGH QUALITY WORKWEAR

AIRPORT COLLECTION

The first Viking Rubber Airport Collection was developed now 6 years ago. It was developed in a close cooperation with airports and their staff. The idea was to create a collection of safety wear, dedicated the work and the staff of airports, in order to ensure safety, functions, comfort and quality. The collection, especially designed and developed for airports and for the airport staff, have been very well received and until today, the collection has been implemented in several airports throughout Europe. From the beginning and until today we have received a lot of positive and constructive feedback, with ideas for new features and for optimization of existing functions and features. All this feedback and more, we have implemented in our brand-new Airport Collection.

On the following pages we are pleased to show the new collection. As each airport normally takes their safety cloth in their own colour way, the garments in the new collection, can be chosen in the colour combinations as shown or can be chosen, in the special colour way of your airport/department. When ordering, you have the possibility to choose your own colour way and your own logo and for this reason the collection is not available from stock.

ALL WEATHER JACKET

The Airport all weather jacket is developed for you who works outdoors in all kinds of weather. The three ground elements in the jacket are safety, comfort and quality.

FEATURES

TROUSERS

The Airport work trouser is developed for the one who wants optimum safety in the Airport and good comfort while working. We've equipped the trouser with Cordura® reinforcement on the knees and other places where the trouser usually is less durable. This increases the longevity of the trouser which means the environment is damaged less as you won't have to buy new trousers often.

WORK TROUSERS

CLASS 2

Safety Airport Trousers EN 20471 class 2. Pre-shaped, reinforced, Cordura knee pockets. Stretch gusset in crotch for better comfort and ventilation. Ventilation openings with zipper on the back side of leg.
